PRESS RELEASE

JAP PERFORMANCE PARTS RE-SIGN WALTON SMITH TO DRIVE THE RB25 SUBARU IN 2011

JPP has Walton Smith back in the Subaru for 2011. The car has undergone further development in the hands of our partner and Europe's leading drift specialists, Garage D. This new car features an RB26 6 speed dog box, wider rear track, custom wide body and custom made front suspension allowing for more lock. Later this year a more powerful 500bhp engine will be introduced.

"2010 was our first year in competitive drifting, with a completely new concept car, team and driver. I am proud of what was achieved and excited and determined to build on the success and develop the car to be one of the best on track. We are developing the car this year with Walton Smith as both pilot and engineer.

It is a bit of an oddball but we are slowly winning over hard core drift fans and traditional Subaru fans. We hope to introduce a new audience to the drift scene; it would be great to see familiar faces from the world of BTCC, Time Attack and Rallying at these events." - Sajid Moghal - Owner JPP.

"I am very excited to be back with JPP for another year. Thanks to the team and sponsors we had a successful 2010 season and we have carried out extensive development work in many areas of this unique car and expect dramatic performance improvements for 2011. I am really looking forward to the events in the calendar as I enjoy meeting new people both on and off the track." – Walton Smith – Garage D

For 2011 JPP are focussing on taking the car to a wider audience in Europe, the main events will be Malta, Switzerland, France, Norway, Poland and of course premier events in the UK too.

The car will be launched on the weekend of 14/15 May at Japfest and then Round 2 of JDM at the Nissan factory.

Through the year our transport partners Car Travel will be handling the car in a WRC trailer which carries the car and a spares package.

There has been massive media interest in the car and team throughout 2010; we hope to gain maximum exposure for our sponsors. We would like to take this opportunity to thank Transvalair, one of our key sponsors, Garage D for developing the car and Car Travel for managing all the logistics and transport.
